

Scientifically formulated probiotics for Shrimp

Provin Plus is a proven blend of multistrain probiotics which influences water quality in Aquaculture. Aqua pond is tend to influenced by the introduction of microbial pathogens through accumulation of Nitrates and Sulphides in culture system and exchange of water.

Benefits

- ✓ Prevents chances of disease occurrence
- ✓ Reduces H₂S both in the water and soil
- ✓ Stabilizes the variations in water pH levels
- ✓ Naturally controls the phytoplankton blooms & the availability of zooplanton
- ✓ Proven anti-stress & immuno stimulant formula
- ✓ Improves water quality and aquatic environment
- ✓ Removes obnoxious gases accumulated in the pond including Nitrate, Hydrogen Sulfide and Ammonia
- ✓ Reduces BOD and COD while balancing DO levels

Composition:

Lactobacillus spp, Bacillus subtilis, Bacillus licheniformis, Bacillus megaterium, Bacillus polymyxa, Thiobacillus denitrificans, Nitrosomonas spp, Nitrobacter spp, Rhodobacter spp, Rhodococcus spp and Saccharomyces boulardii.

Inclusion rate:

1 kg per hectare or as advised by the Aqua consultant.

Repeat the usage for every 10 days till harvesting depending upon the phytoplankton blooms from the aquatic system.

Application:

Mix and dissolve 1 kg of **Provin Plus** with 50 litres of chlorine free water and spread the solution around culture surface of the pond.

Use aerator for some time for uniform distribution of the solution.

For Feed mixing: 5 to 10 grams per kg of feed

Presentation: 500 grams
