

ACIDAC GOLD™

Effective Potent Acidifier

It is ideal to ensure contamination free quality Animal feed to maintain healthy standards to run animal health business successfully. **Acidac Gold** is a feed acidifier included in feed in order to lower pH of the feed, gut and microflora competing the host nutrients and results in better growth and performance of the chicken.

Benefits

- ✓ Prevents lumping of feed
- ✓ Noncorrosive and nontoxic
- ✓ Favours optimal enzymatic activity
- ✓ Improves conditions for better digestion
- ✓ Helps in optimum weight gain in broilers
- ✓ Effectively inhibits growth of the most Gram-positive bacteria, moulds & yeasts
- ✓ Effective against E.coli, Salmonella, Clostridium & Pseudomonas bacterial species
- ✓ Improves FCR and requires no withdrawal period
- ✓ Controls pathogens during the production of feed resulting in high quality feed

Composition:

Acidac Gold is a blend of organic and inorganic acids of high biological value with powerful combination of synergistically acting Benzoic acid, Propionic acid, Acetic acid, Butyric acid, Formic acid, Sorbic acid, Malic acid, Citric acid, Lactic acid, Phosphoric acid and HSCAS.

Inclusion rate:

Regular use in feed: 500 grams to 1kg per tonne of finished feed

Mode of action:

Organic acids enter the cell wall of bacteria & breaks down DNA which lowers pH. Cell wall tries to regain the internal pH to neutrality with active transportation of H⁺ out of the cell leading to serve loss of energy resulting in the bacterial wall breakdown.

Presentation: 25 kg Bag
